**Subject:** microsoft settlement

microsoft settlement should be labeled "microsoft witch hunt"...  
microsoft has done nothing out of the ordinary for modern business  
practices...if microsoft is to be the goat for modern business procedures  
then every other big and middle sized businesses should be closed down...if  
this is what the witch hunters really want-then they are a bigger danger to  
our country than all the "outsider"...stop picking on the engines of our  
economy and let them compete with each other without government  
intervention...  
thank you.
